

## The color in the service of interior decorators

*The service of customizing the color of all the creations in the catalog is active.*

Trieste, April 14, 2014 - From this month the Calleadesign has enabled the service of customizing the color of all the items of furniture of own production.

This is a service designed for architects and interior designers, who despite already benefit from the CalleaDesign [contract solutions](#) and who can now count on one more service to allow perfect integration of [wall clocks](#) CalleaDesign. Each creation is handcrafted directly for the customer based on the characteristics requested.

Art. 10-325 Wall clock Kubo

The choice of the color can be done from thousands of colors directly from the color chart RAL Classic, RAL Design and NCS. Particularly interesting, in the absence of physical color chart, is the use of the instrument NCS Navigator directly on the web that allows you to find and encode the desired color from 1950 available. The color option Calleadesign can be activated directly on the website and it takes 20/25 days including delivery to destination by courier.
